# Using your smartphone (Android/iOS) – DR750X-2CH

Playing and Managing Videos · https://manual.blackvue.com/docs/dr750x-2ch/playing-and-managing-videos/using-your-smartphone-android-ios-dr750x-2ch/

## Opening video files

1. Search for the BlackVue app in the Google Play Store or Apple App Store and install it on your smartphone.
2. “Pair” your smartphone with the BlackVue dashcam via Wi-Fi Direct:
    a. Press the Wi-Fi button once to turn on Wi-Fi.
    b. Go to your smartphone's **Settings** then select **Wi-Fi**, and make sure Wi-Fi is turned on.

    c. Choose your BlackVue dashcam from the network list. The dashcam’s default SSID begins with its model number (e.g. BlackVue900X-******).
    d. Enter the password and tap join.
    * The default Wi-Fi SSID and password is labeled on the dashcam. To find them, unplug the

cables and remove the front camera from its mount.

e. Open the BlackVue app and select **Wi-Fi**.

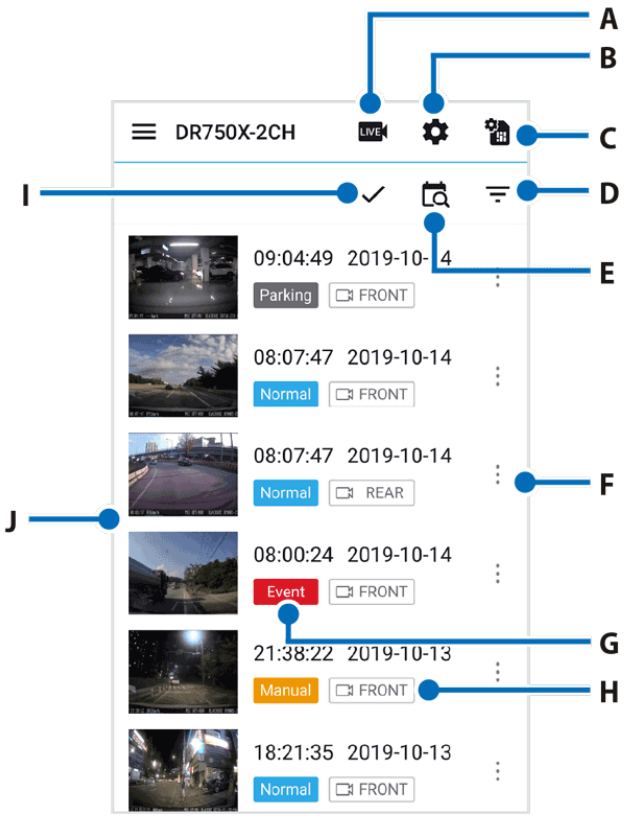

f. Select the video file you want to play from the video list.

**Note**

- The playback of 4K UHD resolution, 'Highest' image quality and/or H.265 coded videos depends on your device's hardware and software. Older devices may not support 4K UHD, 'Highest' image quality or H.265 video playback. If you encounter issues please check your device's video playback capabilities.
- Wi-Fi Direct lets you directly connect your smartphone to your dashcam via Wi-Fi within a range of 10m.
- The BlackVue app is available for devices running Android 5.0 and higher, or iOS 9.0 and higher.
- You can change Wi-Fi SSID and password as described on **CHANGING / RESETTING WI-FI DIRECT SSID AND PASSWORD**

## Wi-Fi screen composition

**A)** Live view

**B)** Firmware settings

**C)** SIM card activation

**D)** File type Filter

**E)** Date Filter

**F)** Video file menu

**G)** File Type

**H)** Video Source

**I)** Multi selection

**J)** Video list

### Note

- All images shown are for illustration purpose only. Actual app may differ from images shown.

# Playing video

## Playing back videos

Select the video file you want to play from the video list.

Scroll up/down the screen to refresh the video list.

### Note

• The playback of 4K UHD resolution, 'Highest (Extreme)' image quality and/or H.265 coded videos depends on your device's hardware and software. Older devices may not support 4K UHD, 'Highest (Extreme)' image quality or H.265 video playback. If you encounter issues please check your device's video playback capabilities.

## Identify video files by recording type

| | | |
|---|---|---|
| Normal | **Normal** | The dashcam records in normal mode by defa |
| Event | **Event** | When the dashcam detects an impact while in and saves an event recording beginning 5 sec limit will also trigger an event recording. |
| Parking | **Parking** | In parking mode the dashcam continuously bu field of view, it saves a parking recording begi |
| Manual | **Manual** | If proximity sensor is set as a manual recordin finger within 20 mm of the sensor will turn on |

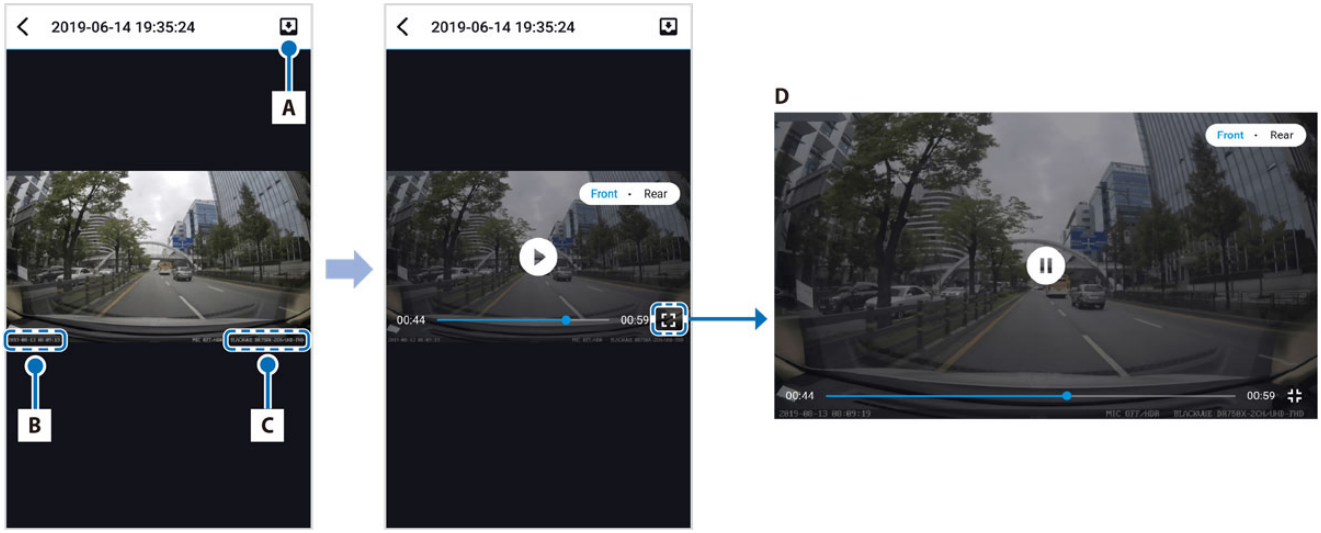

### Note

• To filter the video files, press . Use the Normal, Event, Parking, Manual buttons to filter the video list by recording type (Normal, Event, Parking and Manual. The Event filter button displays both E (Event) and I (Impact event while parked) recordings.

• The dashcam requires a constant power source to record in parking mode. See "**Optional accessories**" for more information.

## Checking the displayed time & GPS data

The time the video was recorded is displayed in the lower left corner of the video in the playback screen. If the displayed time in the recorded videos is incorrect please see "**Time settings**" for more information.

**A)** Download to Internal Memory

**B)** Date, Time & Speed

**C)** Model name

**D)** Landscapes View

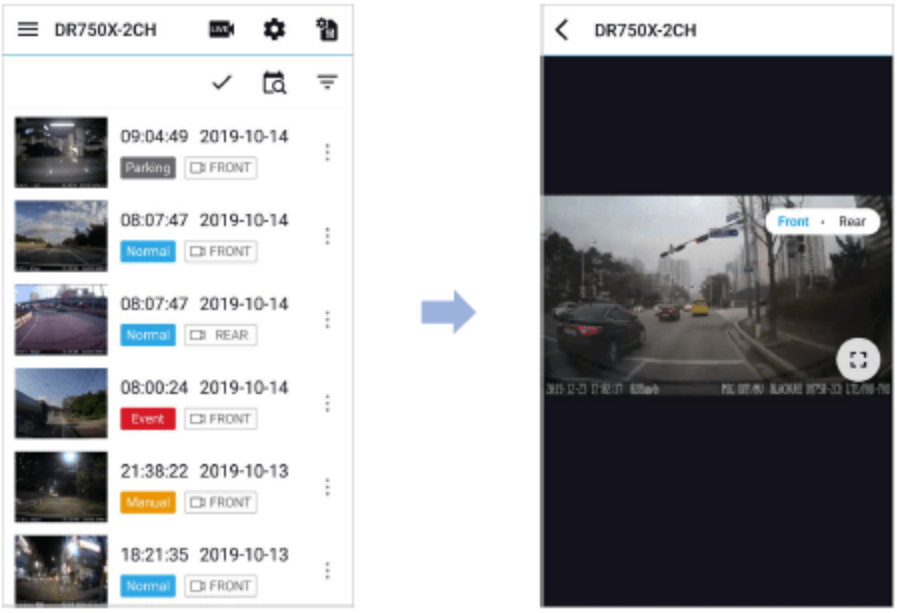

The vehicle's speed is displayed in the lower-left corner of the video.

1. Tap the screen to playback the video.

2. Rotate your smartphone to switch between portrait and landscape display modes.

## Real-time streaming video (Live View)

You can view in real-time the video currently being recorded by connecting your smartphone to the dashcam via Wi-Fi Direct.

1. Go to your smartphone's **Settings > Wi-Fi** and connect to your dashcam.
2. Open the BlackVue app. Select **Wi-Fi** and tap the LIVE button.
3. Rotate your smartphone to switch between portrait and landscape display modes.

**Note**

• When watching Live View via Wi-Fi Direct, map data isn’t displayed because your smartphone can’t access internet as long as it is connected to dashcam’s Wi-Fi.

# Managing videos

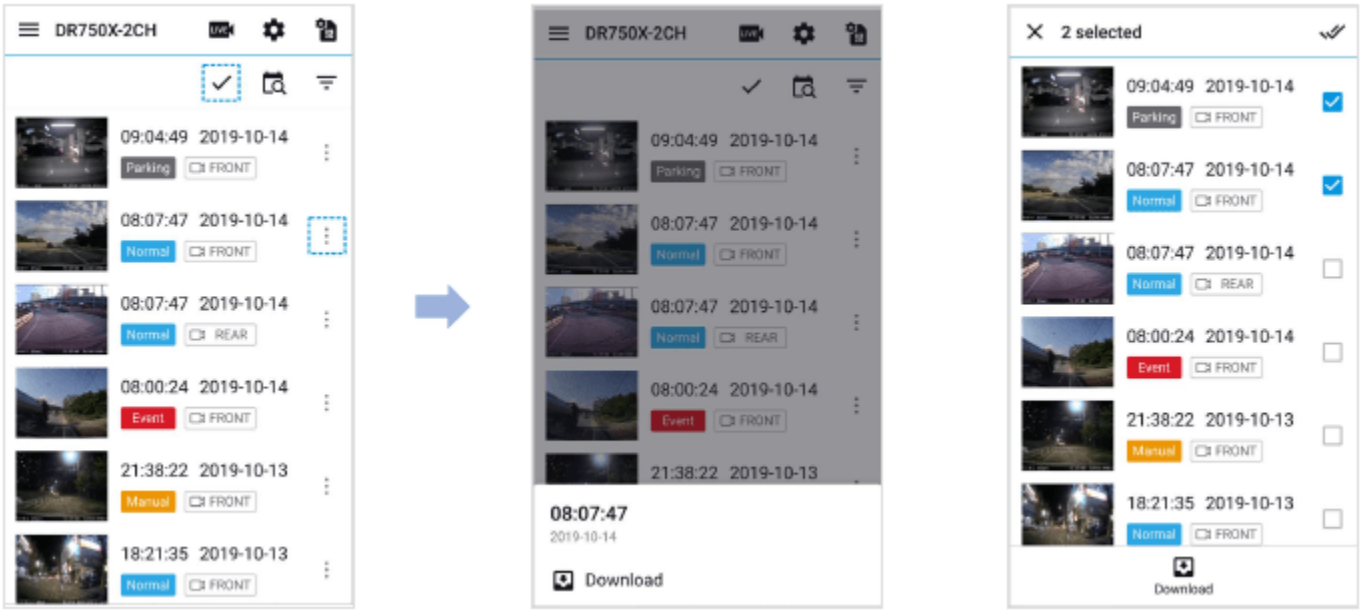

## Managing videos in Wi-Fi

You can manage the recorded videos using the BlackVue app.

**Note**

• When the microSD card fills up, the newest video files will start to replace the oldest video files (called loop recording) – so you will always have the most recent video files.
